EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant Attorney Mark Kirkland on June 17, 2009.

The application has been amended as follows:

- Claim 1, replace with -- A circuit, comprising: a clock transmitter in communication with a clock bus, the clock transmitter to transmit a clock signal on the clock bus; a clock receiver in communication with the clock bus, the clock receiver to receive a clock signal on the clock bus; and a driver in communication with the clock bus, the driver to drive and maintain a voltage of the clock bus to a first voltage level while the clock transmitter is not transmitting a clock signal on the clock bus and the clock receiver is not receiving a clock signal on the clock bus; the circuit further including enabling circuitry in communication with the driver, the enabling circuitry to enable the driver when the clock transmitter is not transmitting a clock signal on the clock bus and the clock receiver is not receiving a clock signal on the clock bus. --.
- Cancel claim 6.
- Claims 7-9, change "claim 6" to -- claim 1 --.

Art Unit: 2116

- Claim 23, replace with -- A circuit, comprising: a clock signal transmission means in communication with a clock bus, the clock signal transmission means for transmitting a clock signal on the clock bus; a clock signal receiving means in communication with the clock bus, the clock signal receiving means for receiving a clock signal on the clock bus; and a voltage driving means in communication with the clock bus, the voltage driving means for driving and maintaining a voltage of the clock bus to a first voltage level while the clock signal transmission means is not transmitting a clock signal on the clock bus and the clock signal receiving means is not receiving a clock signal on the clock bus; the circuit further including enabling means in communication with the voltage driving means, the enabling means for enabling the voltage driving means when the clock signal transmission means is not transmitting a clock signal on the clock bus and the clock signal receiving means is not receiving a clock signal on the clock bus. --.
- Cancel claim 28.
- Claims 29-31, change “claim 28” to -- claim 23 --.

2. The following is an examiner’s statement of reasons for allowance: the claims are allowable because none of the prior art(s) cited, anticipate(s) or render(s) obvious a circuit of claim 1 with “a clock transmitter in communication with a clock bus ... a clock receiver in communication with the clock bus... a driver in communication with the clock bus, the driver to drive and maintain a voltage of the clock bus to a first voltage level... including enabling circuitry in communication with the driver, the enabling circuitry to enable the driver when... and the clock receiver is not receiving a clock signal on the clock bus...” in conjunction -- i.e., viewed

as a whole -- with each and every limitation of the claim; and a circuit of claim 23 with "a clock signal transmission means in communication with a clock bus ... a clock signal receiving means in communication with the clock bus... a voltage driving means in communication with the clock bus, the voltage driving means for driving and maintaining a voltage of the clock bus to a first voltage level... including enabling means in communication with the voltage driving means, the enabling means for enabling the voltage driving means when... and the clock signal receiving means is not receiving a clock signal on the clock bus..." in conjunction -- i.e., viewed as a whole -- with each and every limitation of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
